Notes:

- When ordering, please let us know whether the drain is desired on the left or right, as well as the water connection (see drawing)
- The sinks can also be recessed
- Flush pipes and washing frame before start-up
- Max. Line pressure 5 bar
- Install fine filters in the supply line
- The line withstands an operating pressure of max. 6 bar. If an increased pressure is present, a pressure reducing valve must be installed on site
- The pipes must be emptied if there is a risk of frost
- Faucets are not included. Under accessories you will find a number of possible taps and washing brushes
- The prices do not include preparatory work on site, installation and transport. Installation must be carried out by a local plumber/construction company
- Foundation / support, water connection and drain with sludge collector must be installed by the customer before installation
